AZTEC Contractors, INC.
1200 Wyoming Ave.
El Paso, Texas 79902-5510

Dear Mr. Spencer,

AZTEC Contractors, Inc. currently completed a project for USACE and the Drug Enforcement Administration entitled, "EPIC Roof Replacement". In June 2015, the Project Delivery Team was awarded a "TEAM of the MONTH" award based on the quality work accomplished for our customer. Below is an excerpt from the team write up:

"The contract was awarded to an 8a Small Business Contractor, which contributed to our USACE small business goals within the government estimate threshold. During the winter this year, El Paso had an unusual snow storm that caught everyone by surprise. The contractor was in the middle of his demolition in one area and the 3 to 4 inches of snow was melting and slowly making its way inside the building. The Project Engineer on site and the construction manager were quick to respond and device a plan and a makeshift roof drain that helped EPIC facility remain dry. The unusual rainfall in El Paso during the construction period offered many challenges but our contractor and our USACE field team treated each as an opportunity to overcome. They provided a quality project to our customer."

We have enclosed certificates of appreciation for you and your team. Again, thank you for the work performed during project execution and for helping USACE fulfill our customer's expectations. If you have any questions, please call me at (817) 886.1602.

Respectfully,

A handwritten signature in blue ink, appearing to read "Norma G. Edwards".

Norma G. Edwards, P.E., PMP
USACE Program Manager
